Click on any hostname to see more info about the system (e.g. compilers)   (*) as reported by 'uname -p', except on Windows and Mac OS X   (**) as reported by 'gcc -v'

Package STATUS - *Package status is indicated by one of the following glyphs:*
- **TIMEOUT** *INSTALL, BUILD, CHECK or BUILD BIN of package took more than 40 minutes*
- **ERROR** *INSTALL, BUILD, CHECK or BUILD BIN of package returned an error*
- **WARNINGS** *CHECK of package produced warnings*
- **OK** *INSTALL, BUILD, CHECK or BUILD BIN of package was OK*
- **NotNeeded** *INSTALL of package was not needed (click on glyph to see why)*
- **skipped** *CHECK or BUILD BIN of package was skipped because the BUILD step failed (or because something bad happened with the Build System itself)*

Click on any glyph in the report below to see the status details (command output).

Package propagation STATUS - *Package propagation status is indicated by one of the following glyphs:*
- 🟢 YES: Package was propagated because it didn't previously exist or version was bumped
- 🔴 NO: Package was not propagated because of a problem (impossible dependencies, or version lower than what is already propagated)
- 🔵 UNNEEDED: Package was not propagated because it is already in the repository with this version. A version bump is required in order to propagate it

A ~~crossed-out~~ package name indicates the package is deprecated.

Use the check boxes to show only packages with the selected status types: ☑ **TIMEOUT**   ☑ **ERROR**   ☑ **WARNINGS**   ☑ **OK**
